What is a Frequency Imprinted Sticker?

Everything around you has a frequency!! Just like a CD has music imprinted on it, I can now imprint frequencies into a Holographic sticker and your body can benefit from the frequencies. frequencies, can be imprinted onto these stickers. Just place these stickers on the left side of your body, in your pocket, bra or shoe, on your clothing, bedding, or even your water bottle and skin care products. For example, if you wish to imprint water with your frequency sticker, simply stick the holographic sticker to the outside of a water bottle. Leave the drink for a while for it to absorb the frequencies. Then drink it, and you will receive the health benefits from these frequencies. You can also place the skin frequency sets on your skin care products and the product will absorb the frequency.

-

How do you verify your stickers are still active?

Pour distilled water into 2 different glasses. Place the sticker under one of the glasses so it can absorb the frequency for an hour prior to freezing. Place 1 of the glasses of distilled water on top of the imprinted sticker. Keep glasses as far away from each other as possible. Freeze both glasses of water. Once frozen, the plain water should be foggy and chaotic and the sample with the holographic frequency sticker should be crystal clear with the visible frequency. Stickers that are taken care of have been known to last as long as a year.

How do you take care of your sticker?

1. Avoid direct sunlight on the sticker.
2. Keep away from magnets.
3. Keep out of water.
4. Don't let your sticker get scratched.
5. Stickers last as long as the sticker stays shiny and in good shape.
6. IF you want to apply the sticker directly to your body, use a waterproof band aid and stick the adhesive part of the sticker to the band aid and the holographic part of your sticker towards your skin.
7. To stop the frequencies, you can wrap in aluminum foil. Also, you can wrap in aluminum foil when traveling.
8. Best results are if the sticker is placed on the left side of your body.
